Re: Application for [Job Title / Role]

Dear [Hiring Manager / Selection Committee / Contact Name],

[Introduction paragraph: State the position you are applying for, how you found it, and why you are excited about the role and the company/organization. Express your enthusiasm and give a brief overview of who you are.]

[Body paragraph 1: Highlight your primary technical or software engineering skills that match the requirements of the job. Connect them to your previous experiences, internships, or academic projects.]

[Body paragraph 2 / Bulleted list: Outline 2-3 specific accomplishments or areas of expertise using bullet points to make the cover letter highly readable for recruiters.]

- **[Key Skill/Experience 1]:** [Describe how you applied this skill and the impact it created, e.g. optimization, backend pipelines.]
- **[Key Skill/Experience 2]:** [Describe how you collaborated or led a project, or worked with enterprise software/infrastructure.]
- **[Key Skill/Experience 3]:** [Include any other relevant skills, database expertise, or problem-solving capability.]

[Conclusion paragraph: Summarize why you are a strong fit for the position, express your interest in speaking with them in an interview, and thank them for their time and consideration.]

Sincerely,

Simon Chen
